

Highways email regarding holding objection to Field Scheme

In advance of our meeting next week, I would like to update you on the outcome of the highway authority's development team which was held on Monday.

The Planning Application (2025/1689) for Field View at Great Moulton was presented. There was significant discussion and it was resolved that the Highway Authority would issue a holding objection based on the following grounds:

1. The proposed construction traffic route lacks sufficient width to safely accommodate two heavy goods vehicles (HGVs) simultaneously along the stretch from Flowerpot Lane to the site on Market Lane. A continuous carriageway width of 6 meters should be provided throughout this route. Additionally, forward visibility is notably restricted, particularly between Flowerpot Lane and Wacton.
2. The submitted information does not provide information on how vulnerable road users would be considered and impacted along the proposed route and information is required.

Until the above are addressed the highway authority will continue to object. We expect the applicant to begin negotiations with us and we will keep you informed.
